Doc Version: 0.3

Background

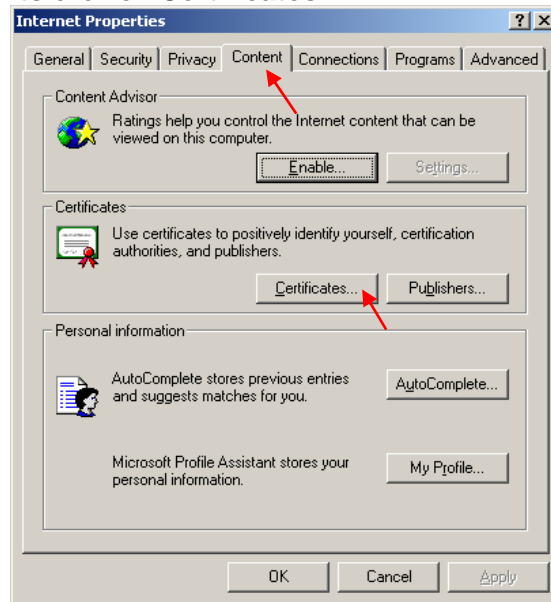

National Institutional Facilitation Technologies was incorporated in September 1995 as a joint venture between a consortium of six banks (*namely, Muslim Commercial Bank, Habib Bank Ltd., United Bank Ltd., Allied Bank Ltd., National Bank of Pakistan Ltd. and First Women Bank Ltd.*) and entrepreneurs from the private sector. All banks in Pakistan, a total of 42, are participating members of NIFT with branches spread throughout the country. In Karachi alone, the number of participating branches is a total of 800. NIFT commenced its ACH operations in 1996, after signing an agreement with the State Bank of Pakistan to oversee clearing operations rendered to all banks and their branches. SBP not only plays a supervisory role for NIFT operations, but it is also a customer and member bank of the automated clearing house. Aiming to create a nationwide grid, NIFT is currently operating in six cities namely, Karachi, Lahore, Islamabad/Rawalpindi, Faisalabad, Hyderabad and now Quetta. Each operational center is accompanied by a state-of-the-art Data Center, equipped with industry-standard, high-speed image-based technology. Karachi, being an exception, has a set-up of three Data Centers: two of which are dedicated to the image-based clearing operations, and the third is confined to the CA/PKI services. Each center has employed a dedicated team of IT professionals, project managers and clearing staff to carry out round-the-clock operations. In line with cheque clearing, banks are offered various value-added services, making operations cost-effective, efficient and free of errors. A relatively new addition to NIFT's portfolio of clearing services is the collection and clearing facilitation for the local US Dollar cheques presented in the country. In collaboration with utility companies, NIFT took another initiative for Utility Bill Payment Processing facilitation in Pakistan. It is currently offering these services to SSGC and IESCO. Previously, these services were also rendered to LESCO. Also collaborating with Standard Chartered Bank, NIFT has setup manned kiosks in Karachi, Lahore and Islamabad to facilitate the collection and payment processing of a variety of bills. In doing so, the company has established itself as the leader in image-based document processing.

Backup Digital ID:

Step 1: Go to your Internet browser select **Internet Options** from **Tool** tab.

Step 2: Select **Contents** click on **Certificates**

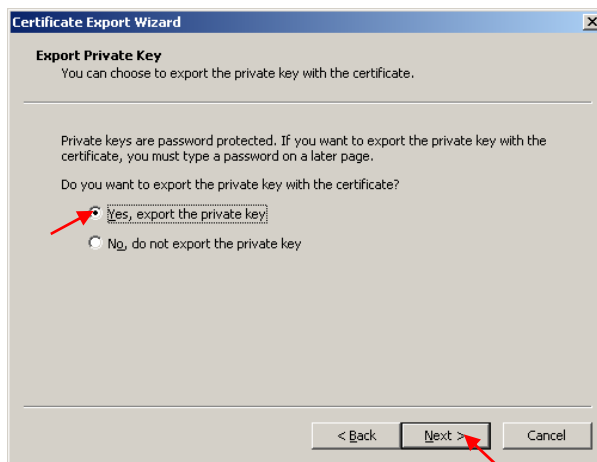

Step 3: Select your **Digital Certificate** from **Personal Tab** and press **Export** button.
